

<prots> <prot d> block <tc r> type <binding> relation A M fixed / target / masked residue

Antibody pair · unconditional

<prots> <ab> Q V Q L V Q . D I Q M T Q <prot d>

heavy · light chains, all residues generated

TCR–pMHC · conditional

<prots> M H C . B 2 M <prot d> <binding> <prots> <pep> G I L G F V F T L <prot d> <binding> <prots> <tc r> C A S S I R . C A S S L G <prot d>

MHC·B2M and peptide are fixed context; the TCR α/β span is generated

Protein–protein / STRING · conditional

<prots> K V F G R C E L <prot d> <binding> <prots> A A R D G Y Y G <prot d>

partner A fixed typed relation partner B generated
